

Electric - Qmax 24 m³/h - 400 l/min (105 USgpm) - Hmax 16 m (52 ft)
Code 8381065687

Product Data

Suction port

Threaded - 1 1/2" ISO 228 (BSP)

Delivery port

Threaded - 1 1/2" ISO 228 (BSP)

Omax

24 m³/h - 400 l/min (105 USgpm)

. .

16 m (52 ft)

Solids handling

20 mm (0.8")

Motor power

1,1 kW - 2 HP

Motor type

Single-phase Standard IEC

Weight

30 kg (66 lb)

Indicative picture of the product

Close-coupled self-priming centrifugal pump with single-phase electric motor

Characteristics

The J series self-priming centrifugal pumps are used in applications where a rapid priming capacity is required from demanding suction heights combined with the ability to transfer and manage polluted fluids, dirty and abrasives with suspended large diameter solids. The system is based on an inspectable pump casing which also acts as a water tank allowing a first quick priming without auxiliary systems, simplifying management of the system and reducing the time for maintenance. Within the physically permitted suction height limits, J pumps are a more comfortable and reliable solution than submersible pumps and vertical submersed impeller pumps.

Benefits

1) Rapid self-priming

Without foot valve up to a height of 7.5 m (24.5 ft)

2) High resistance

To abrasive liquids which are turbid and sandy

3) Semi-open impeller

High thickness casting impact resistant

4) Wear plate/plates

Easily replaceable cast iron wear plate/plates

5) Easy maintenance

Removable front cover for direct access to the impeller

Applications

Industry:

clean, dirty, sandy, muddy, neutral, alkaline, acidic liquids; low viscous petroleum products, solvents even if dirty; milk of lime, caustic soda; washing, cooling, recirculation, smoke scrubbing.

Treatment:

pumping polluted corrosive wastewater containing sand, mud or solids in suspension; dosing neutralizing liquids; pumping out settled sludge.

Naval

loading and unloading; bilge pumping; washing, firefighting, stripping, sanitary duty and circulation.

Agriculture:

surface irrigation; liquid manure oxygenation; transfer and spraying liquid manure or fertilizers; distribution of liquid animal feed; transfer of wine must; washing.

Varisco S.r.I. has certified its Quality, Environment and Safety Management System in accordance with the requirements of the international standard ISO 9001-14001-45001, recognized by the Lloyd Register.

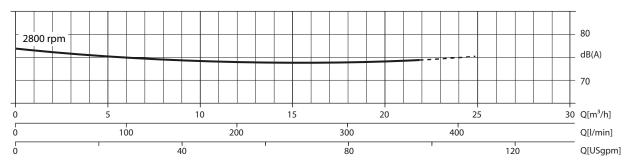

PERFORMANCE CURVES

Test according to UNI EN ISO 9906 standard - level 2B Installed power: 1,1 kW - 2 HP (2.800 rpm)

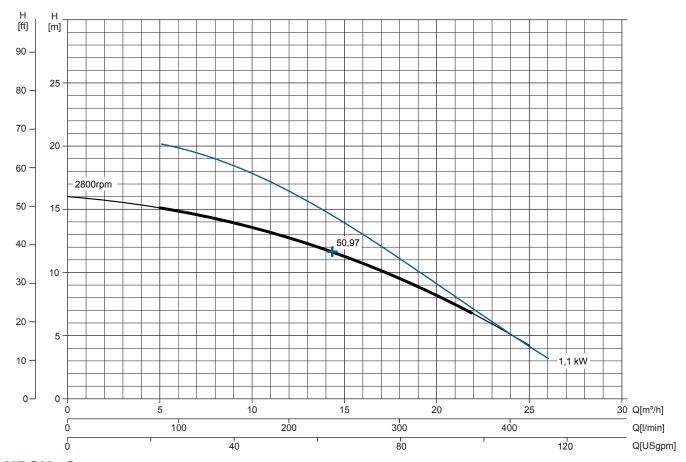

Test liquid: clean water, density 1.000 kg/m³ Spherical solids handling: D.20 mm (0.8")

Noise Curve

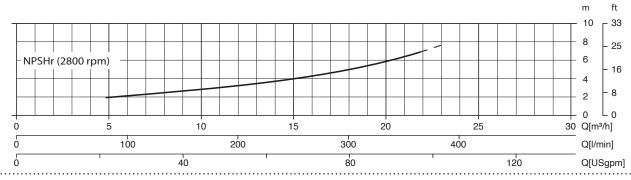

dB(A)=max noise level at 1 m

Speed Curve

NPSHr Curve

TECHNICAL DATA

Pump

Pump model	JE 1-110 G10 NM20
Qmax [2.800 rpm]	24 m³/h - 400 l/min (105 USgpm)
Hmax [2.800 rpm]	16 m (52 ft)
Suction port	Threaded - 1 1/2" ISO 228 (BSP)
Delivery port	Threaded - 1 1/2" ISO 228 (BSP)
Impeller type	Semi open, 3 vanes
Solids handling	20 mm (0.8")
Casing	EN 1561 EN-GJL-200 cast iron
Impeller	EN 1561 EN-GJL-200 cast iron
Wear plate	EN 1561 EN-GJL-200 cast iron
Non-return valve	check valve, NBR
Shaft	C45E EN 10083-2 steel
Mechanical seal	Silicon Carbide / Silicon Carbide
Elastomers	NBR
Lubrication	Grease

Motor

Arrangement

Dimensions	193 x 485 x 238 mm (6,73 x 19 x 9,35")
Coating	Polyurethane enamel, average thickness of 100 μm
Color	RAL 5010 blue (standard)
Features	Close-coupled with rigid coupling "N"
Height connection	0,17 m (0,55 ft)

Optionals

Flanged ports DN40 PN16 EN1092-2 Type B	cod. 10042259
Flanged ports 1 1/2" ANSI B16.1 Class 125 R.F.	cod. 10042817
Automatic mechanical seal greaser	code 10008316
