JS 8-300 T10

Qmax 520 m³/h - 8666 l/min (2290 USgpm) - Hmax 32 m (105 ft) Code 4810062204

Indicative picture of the product

Self-priming centrifugal bare shaft pump

Characteristics

The J series self-priming centrifugal pumps are used in applications where a rapid priming capacity is required from demanding suction heights combined with the ability to transfer and manage polluted fluids, dirty and abrasives with suspended large diameter solids. The system is based on an inspectable pump casing which also acts as a water tank allowing a first quick priming without auxiliary systems, simplifying management of the system and reducing the time for maintenance. Within the physically permitted suction height limits, J pumps are a more comfortable and reliable solution than submersible pumps and vertical submersed impeller pumps.

Product Data

Suction port Flanged - DN200 UNI6082 TL (solder) Delivery port Flanged - DN200 UNI6082 TL (solder) Qmax 520 m³/h - 8666 l/min (2290 USgpm) Hmax 32 m (105 ft) Solids handling 60 mm (2,36") Weight 296 kg (652 lb)

Pump with dedicated code, including thermowell predisposition for temperature sensor and glass oiler for mechanical seal quench fluid, according to **ATEX 2014/34/EU**.

Benefits

1) Rapid self-priming Without foot valve up to a height of 7.5 m (24.5 ft)

2) High resistance To abrasive liquids which are turbid and sandy

3) Semi-open impeller High thickness casting impact resistant

4) Wear plate/plates
Easily replaceable cast iron wear plate/plates
5) Easy inspection and cleaning
Removable front covers for access to the impeller

Applications

Industry:

clean, dirty, sandy, muddy, neutral, alkaline, acidic liquids; low viscous petroleum products, solvents even if dirty; milk of lime, caustic soda; washing, cooling, recirculation, smoke scrubbing.

Treatment:

pumping polluted corrosive wastewater containing sand, mud or solids in suspension; dosing neutralizing liquids; pumping out settled sludge.

Naval:

loading and unloading; bilge pumping; washing, firefighting, stripping, sanitary duty and circulation.

Agriculture:

surface irrigation; liquid manure oxygenation; transfer and spraying liquid manure or fertilizers; distribution of liquid animal feed; transfer of wine must; washing.

Varisco S.r.I. has certified its Quality, Environment and Safety Management System in accordance with the requirements of the international standard ISO 9001-14001-45001, recognized by the Lloyd Register.

JS 8-300 T10

PERFORMANCE CURVES

Test according to UNI EN ISO 9906 standard - level 2B Test liquid: clean water, density 1.000 kg/m³ Spherical solids handling: D.60 mm (2,36") Max. applicable motor power: 45 kW - 60 HP (max 1.800 rpm)

Specification is subject to change without prior notice. Please check with your Varisco representative for the latest specifications. Document release date: April 24th 2024

JS 8-300 T10

TECHNICAL DATA

Pump

• • • •

Pump	
Pump model	JS 8-300 T10
Qmax [1.800 rpm]	520 m³/h - 8666 l/min (2290 USgpm)
Hmax [1.800 rpm]	32 m (105 ft)
Suction port	Flanged - DN200 UNI6082 TL (solder)
Delivery port	Flanged - DN200 UNI6082 TL (solder)
Impeller type	Semi-open, 4 vanes
Solids handling	60 mm (2,36")
Casing	EN 1561 EN-GJL-200 cast iron + QPQ
Impeller	EN 1563 EN-GJS-500 cast iron + QPQ
Wear plate	EN 1561 EN-GJL-200 cast iron + QPQ
Non-return valve	check-valve, NBR
Shaft	39NiCrMo3 EN 10083-3 steel
Mechanical seal	Tungsten carbide / Tungsten carbide
Elastomers	NBR
Lubrication	Grease
Bearing bracket	EN 1561 EN-GJL-200 cast iron, with grease lubricated ball bearings
QPQ: type of nitrocarburizing case hardening that increa	ses corrosion resistance, made in three steps; nitrocarburize+oxidize, polish, and post-oxidize

Arrangement

Model	Bare shaft
Dimensions (L x W x H)*	1089 x 591 x 734 mm (42,9 x 23,3 x 28,9")
Coating	Polyurethane enamel, average thickness of 100 µm
Color	RAL 5010 blue (standard)
Height connection	0,53 m (1,8 ft)
*without flanged ports	

Optionals

Flanged ports DN200 PN16 EN1092-2 Type B	Complete pump set code available on request
Flanged ports 8" ANSI B16.1 Class 125 R.F.	Complete pump set code available on request
Automatic mechanical seal greaser	Code: 10008316
Thermocouple temperature sensor for ATEX pump	TC - Range temperature from 0 up to 300°C
Temperature sensors for ATEX pump	PT100 - Range temperature from 0 up to 300°C

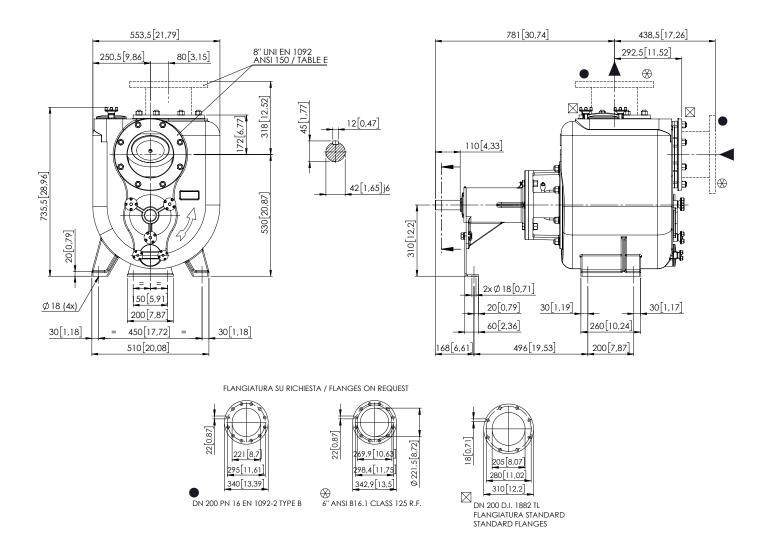

Weight

Net weight	296 kg (652 lb)
Gross weight (pump + packing)	326 kg (718 lb)
